

IRANIAN EXPERTISE

The methodological approach adopted for the project Aquaculture Development in Sistan Baluchestan was, since the planning of the activities, focused on giving value to Iranian expertise which is one of the main target of the Italian Cooperation. The great technical and professional contribution that Iranians can ensure was considered; therefore the decision to in charge Iranian experts to undertake some important actions of the project was taken. Another aspect to be considered is the intention of the Italian Cooperation to increase the project sustainability which is one of the evaluated parameter for project financing and approval.
